

Classic ECO+ bags

An exclusive bag does not have to be laminated!

Most important product characteristics:

- any format and personalisation of the product from 100 pieces!

Materials:

- bags made of ECO papers in white or brown (natural) colour with grammage from 140 to 250 g/m²,
- possibility to make a bag of paper with 100% recycled certificate!
- possibility of using non-standard paper depending on the customer's individual preferences,
- min. 450 g/m² cardboard reinforcement of the bottom, min. 900 g/m² cardboard reinforcement of the top fold,
- the bags are glued only with special tapes, thus guaranteeing the appropriate durability and strength of the adhesive bond.

Types of printing and refining:

- offset printing with the possibility to print the entire surface of the bag in CMYK or Pantone colour system,
- possibility to print in full colour, also inside the bag,
- possibility of screen printing on a dark underbase to obtain more distinct printing colours,
- offset lacquer to protect the print from smudging,
- spot UV varnish,
- hot-stamping (e.g. selected elements of the bag made with hot-stamped gold foil),
- embossing and debossing (e.g. logotype).

* refining methods can be combined.

Types of handles and finishes:

- cotton or synthetic cord with a length suited to the size or requested by the customer,
- satin, baize or cotton ribbon tied in a knot, or glued into the top fold,
- possibility of placing metal eyelets (available in different colours) in the holes through which the cord or ribbon is threaded,
- die-cut handle in any shape,
- die-cut handle with flap and easy closing system using double-sided tape,
- die-cut handle with flap and convenient Velcro closing system,
- die-cut handle with flap and ribbon to tie a bow,
- closing in the form of a ribbon glued into the top fold, used to tie a bow,
- closing slot + ribbon to tie a bow.

Possibility to design any shape of a bag or individual solution also from 100 pieces.
